

Chassis Runner

Fluorescent Lamp

Chassis Runner

Chassis Runners are designed for both 19" and non 19" compatible equipments that require additional support along their depth. Chassis Runners, commonly known as support angles or L-brackets, are fixed directly along the inner frame of the main cabinet panel mount and provides no hindrance to the mounting of 19" equipments complying with the standard rack entrance width.

Cage Nuts Assembly

Cage Nuts Assembly

Cage Nuts Assembly are used for the mounting of 19" equipments in the racking system. These highly dependable M6*12 screws come with protective black-coloured washers snap-on cage nuts are suitable for panel mounts with thickness of 1.5mm and 2mm.

Heavy Duty Castor Wheels

Castor wheels are essential in the transportation of the racking systems. The high durability of the castor wheels allow for the cabinet to be put in motion easily and yet, securely.

Adjustable Leveling Legs

Adjustable leveling legs are important in the leveling of the entire racking system in environments with uneven grounds. The adjustable function of the leveling legs brings about great flexibility in the on-site positioning and deployment of the cabinets.
